Business Consulting Engagements

Healthcare Technology Start-Up (Confidential) / New York, NY / July 2026 – Present (Part Time)

Principal Business Strategist – GTM Plan, Business Architectural Roadmap, Blueprint to Obtain Necessary Funding – Healthcare FinTech Start-Up

- Own go-to-market for an AI compliance product sold into independent clinical practices — segmentation, positioning, pricing tiers (\$99/\$249), channel strategy, and the sequencing that determines which motion gets funded first.
- Built the multi-tenant, role-scoped client engagement tracker that runs the advisory practice using Claude Code — including 60 automated tests asserting cross-client data isolation — with no prior engineering background.
- Designed and launched a 30–40 interview customer discovery sprint to size real addressable demand — screener, interview guide, scoring rubric, and 150-practice candidate universe built from scratch — classifying prospects by platform dependence against a pre-agreed threshold that fires a documented kill/pivot decision instead of a debate.
- Concluded that distribution — not product — decides the outcome, redirecting GTM toward malpractice-carrier and professional-association channel partnerships after modeling that a direct human sales motion cannot carry a 12–18 month CAC payback at those price points.
- Set the unit-economic gates the motion is now measured against: blended CAC under \$900, payback under 12 months, monthly churn under 5%, time-to-first-value under 7 days.
- Produced the customer- and investor-facing collateral the company now sells with: pitch deck, competitive battlecards, partner negotiation sheets, and an eight-document executive round table with per-presentation talking points.
- Mapped a \$0.76B category projected to reach \$5.9B by 2035 (22.8% CAGR), benchmarked five direct comparables across four structural models, and built a decision tree of four exit paths with base-rate odds attached — including the cautionary comparable that won regulatory clearance and still failed on commercialization.
- Ran financial forecasting (P&L, tool-stack cost model, Year-1 ARR band) and barriers-to-entry analysis to price strategic alternatives before capital committed; recommended a ~\$2.15M non-dilutive federal funding route over an equity raise, tied to a dated decision gate.
- Applied scenario planning and second- and third-order consequence analysis across business, technology, regulatory, and organizational exposure — surfacing downstream consequences before commitments locked in.

HVAC Services Firm (Confidential) / Santa Clarita, CA / August 2026 – September 2026 (pro bono)

Consultant - Principal Analyst GTM Expansion

- Designed and built the engagement's decision system end-to-end: an intake form converting raw inputs into a structured client profile, source-tagged evidence tracking, pre-set go/no-go criteria, and a phase-gated scan list sequencing the full analysis.
- Ran a two-site catchment and new-territory analysis for a services operator's proposed branch expansion, mapping drive-time overlap against existing sites and setting the monthly cost ceiling the location had to clear to justify the investment.
- Built a feasibility dashboard with kill/pivot triggers for an HVAC firm's market-overlap expansion, using cost-ceilings to curb cannibalization and protect profit.
- Analyzed a proposed expansion site for an HVAC services firm and delivered a feasibility roadmap and governance framework built on a cost-ceiling approach, giving leadership a structured basis for evaluating the expansion decision beyond the initial feasibility dashboard.
